Yes, that date sounds just fine. Thanks for checking.

Sorry to bother you, but OFR is checking on the following

Stephanie,

Final question, there are 3 years and 9 months insert dates on pages 243, 247, 248, 250. Per calculations, that falls on Tuesday, May 15, 2018.

I want to confirm that date with you before scheduling the document.

Regards,

Stacey

Hi all, this is OFR's final document version incorporating the additional edits for review and approval.

Please review the document carefully.

Also, a letter accompanied the document requesting publication for August 15, 2014.

It looks good – although I also removed the one remaining comment on the inadvertent errors memo (it was on p. 48), to be consistent with removal of the others. Reattached with slightly different name.

Hi Julie,

Please take one more look at the file. I verified that the edits in the memo are in the document, however, I removed the comments regarding the “inadvertent memo” and there was an auto coloring that I removed. Please review to ensure the edits in the attached, which will be the document I return to OFR, are the FINAL edits for OFR to publish your document.

Thank you

Here is the file you sent us, with our edits made on top, according to the inadvertent errors memo.

I put a comment bubble by each, to make it easy to find them. One of the exhibit edits looks slightly different than it does in the memo, but as I explained in the comment bubble, I think the rows appeared in a different order in the memo, as compared to the document you had. I went with the approach of the simplest edits, because in the end, the order of rows does not matter.

I have looked through all of these edits, and they are fine. You had some comment bubbles, and our response to those, just for clarity, are:

- We agree with comment on p. 214
- We agree with comment on p. 553

Note, however, that we determined that there were a few other inadvertent errors in the preamble, and this week, the memo detailing those errors went to the Administrator for signature (I know specifically that it has been signed by OW and OGC, [REDACTED])

[REDACTED] Attached is the final version of the memo so you will know what the additional corrections are while waiting for the signed memo.

We would like for the rule to be published in the FR **on August 15, 2014**. We don't want it publishing earlier, because we need to first publish the separate 2nd FR notice on the ICR for this rule; however, we can't send that to you now, via OEI, because we're still in the public comment period of the 1st FR notice. An August 15th publication for the rule gives us just the right cushion of time. Delaying publication in the FR of this rule beyond August 15th would have the sole effect of delaying environmental protection.

I understand that the FR will send the rule back to EPA if this document is not returned to them by Monday. Let me know if there's anything else you need from us.

And finally, thank-you for your patience. I think there is not a single dimension in which the 316(b) rule was not difficult.

Julie

Hi all, here are OFR edits and I added a couple of minor edits as well.

Please review and approve these edits. Please state in your email if you have additional edits or comments. Do not accept nor reject OFR edits.

Also, we only need one response, so please coordinate your response(s) through one person.

Thank you.
